

# Ventilating Cathedral - Raked or Skillion

Today we have a marked increase in raked and cathedral ceilings in a quest for elegance in limited space.

Efficient and controlled ventilation of these areas was always difficult, and only now, with the Condor Flowmaster ceiling purge vents, is one able to do so.

advantages of Condor Purge ventilation systems,

- ▶ **Motionless**
- ▶ **Silent**
- ▶ **Effective natural cooling**, particularly during the evening purge cycle, by allowing natural displacement.
- ▶ Marked **reduction of cooling costs**.
- ▶ **Cyclone rated**
- ▶ **Manual or remote controlled**

Condor cathedral venting systems are available in a range of sizes and are easy to install to all roof types.

Roof unit is full stainless steel fabrication to suit roof pitch and colour as specified by architect
